These models are designed to solve the problem of pruning at various heights. With 4 measures of fixed poles (80, 100, 150 and 200 cm) and lithium batteries, they cover a wide range of different plantations. The biggest advantage of these products is their balance because the majority of the weight is located, unlike other brands, in the lower part of the pole, reducing effort and fatigue when working.

Equipment included: suitcase, battery with electronic board, backpack, battery charger, cable with connectors, sharpening stone, keys for blade replacement, protective oil for blades, worm screw grease, straps for fixing the cable to the arm.
