VT3 FOAMING is Volpi Originale first compression foam sprayer designed to spray the specific foam prewash product onto the surface to be cleaned.

VT3 FOAMING is a handy ally for those who intend to perform a foam prewash to their motorcycles, cars, bicycles and various surfaces such as sheet metal barbecues, glass, stone and/or stoneware exterior walls. Performing a proper foam prewash drastically reduces the risk of finding scratches, for example on the bodywork, which in most situations are due to incorrect washing technique.

VT3 FOAMING is a sprayer able to create a compact foam that will act in contact with the surface to be treated, going to soften the dirt and making it easily removable in the next rinsing phase, guaranteeing a safe prewash. Thanks to this sprayer, which has been studied and designed for use with detergents with surfactant properties, in just a few moves it will be possible to carry out a complete, high-performance foaming prewash.

Compression sprayer	With safety valve
Working pressure bar	2
Tank material	High resistance PE
Nozzle material	Polypropylene
Pin material	PVDF
Handle springs and valve material	Stainless steel
O-ring material	FPM
Total tank capacity Lt	2
Filling mouth diameter mm	60
Net weight Kg	0,46
Packing dimensions cm	16 x 16 x 33

The sprayer should always be washed after each use and run with clean water for a few minutes.

IMPORTANT: STRICTLY FOLLOW THE DIRECTIONS ON THE USE OF THE PRODUCTS, GIVEN IN THE INSTRUCTION MANUAL.
